Methods of Instruction Certification Course

Advanced Training for Practical & Professional Law Enforcement Skills

Date: November 18-22, 2024

Location: Alberta Training Academy

Edmonton, AB

Attaining Excellence Through Research-Based Pedagogy

What You Will Learn

- Correct identification of evidence-based training needs.
- How to design and implement a scaffolded and interleaved curriculum.
- Current training myths that plague our training.
- Understanding motor skill and motor learning development.
- Understand and maximize the 'spacing effect' in motor learning.
- Understand how people acquire effective motor skills.
- Articulate the importance of skill Retention & Transfer and how to optimize through training.
- Implement the 6 essential preconditions for effective motor learning.
- Correct coaching and feedback methods.
- And much more!

Why is this Course Necessary?

"An officer never 'rises to the occasion', they fall to the level of their training"

How individual officers respond during rapidly unfolding, time-compressed violent encounters, is heavily underpinned by how those officers are trained. Therefore, law enforcement firearms and use of force instructors have an immense responsibility.

Training is both art and science. The responsible law enforcement Trainer's focus and efforts must therefore be on designing and implementing training programs that reflect comprehension of the current research regarding correct skill selection, training design and instructional pedagogy that results in optimal learning and retention of the critical police skills that our officers need.

What You Need To Know

You Have to Get Training Right

During this intensive course, students will be deeply challenged by the exploration of paradigm-breaking, scientific principles which they will be able to apply immediately and directly to their setting in the Academy or Agency's training programs.

Through the use of pre-course directed study, in-class instruction, facilitated group work and analysis, case studies and practical application, you will learn about effective training methods and procedures that are well established in the scientific literature and how they might be incorporated into existing academy and/or agency in-service training programs.

When:

November 18-22, 2024

Where:

Public Safety and Emergency Services Training Academy Edmonton, AB

Course Cost

$1150

RAPTOR
PROTECTION AND SAFETY SERVICES

Who Should Attend?

This course is intended for all law enforcement instructors, sworn and civilian, responsible for the curriculum design, implementation and instruction of all physical movement skills being taught to law

Course Facilitator

Chris Butler, Chief Training Officer for Raptor Protection & Safety Services Inc., retired as an Inspector after 34 years in law enforcement.

During his policing career, Chris became a full-time instructor in the academy, teaching both recruits and in-service police officers a variety of physical use of force techniques as well as combat firearms instruction. For the last several years of his career, Chris developed and instructed Incident Command / Crisis Decision-Making training to sergeants, staff sergeants and Inspectors.

Chris's passion for exploring and understanding exceptional human performance in rapidly unfolding, ambiguous, high-consequence events began during his 6 years as a technical mountain Search and Rescue Technician. His exploration for evidenced-based training methodology has continued throughout his law enforcement career. Chris has been fortunate to be able to work with some of the worlds top researchers, coaches and physical skill performers.

Chris is the host of the Trainer's Bullpen podcast, a free learning resource offered to anyone interested in truly advancing their training and coaching tradecraft. The podcast can be found at www.trainersbullpen.com
